

Normally the **safety nets manufactured in Visornets** comes regularly in standardized sizes by market or customer , always square or rectangle sizes.

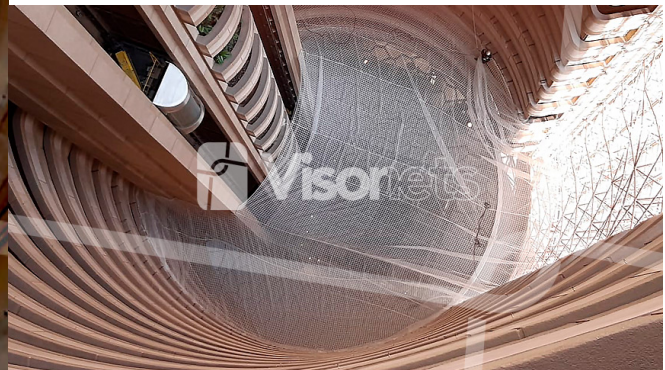

But what it happens if a customer need a specific safety net for a particular solution where the net is not square or rectangle?

Well, no problem at all at Visornets, we do have a fully experienced engineer department and experienced netmakers as well, so we can make it real any drawing you need for your Project as so special as it will be.

Safety net Type S - Special shape

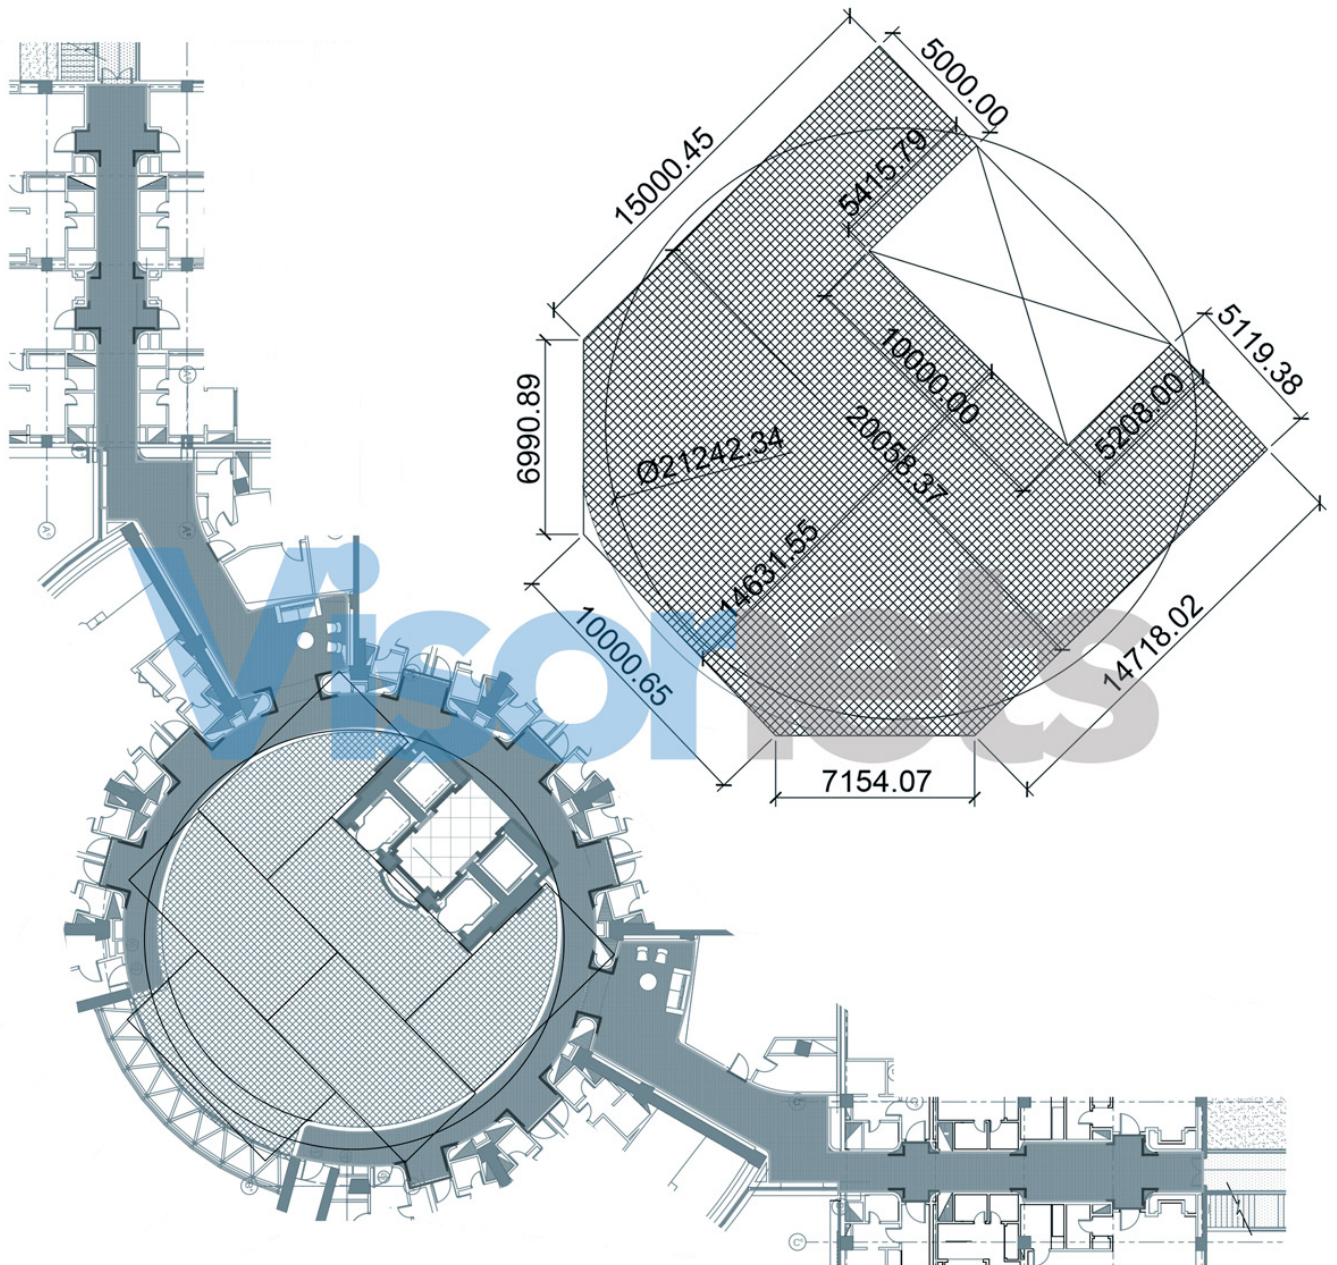

Let's see one of the latest special Project: A customer came to us asking if is posible to make a safety net with a very speacial shape, because they have to install it for protecting the fall people and debris in maintenance labours inside a big rated hotel. The solution with netting had to protect the worker and the hotel clients because the net will have to be just up in the lobby.
